PROFILE

Full-stack software engineer and UTS Master of Information Technology graduate (WAM 86.9, Dean's List). Sole builder of bubblechickenlab.com — production apps spanning portfolio (NACI), resume and application workflow (KATA), and interactive 3D resume (Tower Zero) with React, TypeScript, Supabase, and Three.js. Coursework and team delivery across cloud (AWS, CI/CD), NLP (94 HD), and deep learning (95 HD, TechFest AI Showcase nominee). Led a 48-hour UniHack MVP and co-founded a 1,000+ follower student association. Bilingual English and Mandarin Chinese.

EDUCATION

University of Technology Sydney

Aug 2024 – Aug 2026

Master of Information Technology, C04295 · WAM 86.9 · GPA 6.5/7 · 96 CP

- Dean's List 2026 · Program completed (Passed)
- High Distinction: Cloud Computing and SaaS (100), Infrastructure for Cloud Computing (95), Deep Learning and CNN (95), NLP Algorithms (94), Project Management (97), Fundamentals of Software Development (91), Enabling Enterprise Information Systems (91), Fundamentals of Data Analytics (87)
- Relevant coursework: Data Structures and Algorithms, Databases, Networking, Cybersecurity, UNIX Systems Programming, Industry Project, Professional Practice in Computing

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS, C, C++

Frontend and UI: React, Next.js, Three.js, React Three Fiber, Tailwind CSS, Responsive UI, Internationalization (English, Traditional Chinese, Simplified Chinese), SEO, Google Analytics

Backend and Data: Node.js, Express, FastAPI, REST APIs, JSON schemas, PostgreSQL, MongoDB, Supabase, OAuth, SQLite

Cloud and DevOps: AWS, Azure, GCP, Docker, Git, GitHub, CI/CD, Vercel, Railway, Linux, UNIX, Networking (TCP/IP, DNS)

Computer Science Fundamentals: Data Structures and Algorithms, Databases, Object-Oriented Design, System Design, Debugging and Troubleshooting

Languages (Human): English (Fluent), Mandarin Chinese (Native), Explaining Trade-Offs to Non-Technical Audiences, Async and Remote Collaboration

PROJECTS

Tower Zero

Jun 2026

Sole Developer

React, TypeScript, Three.js, React Three Fiber, Vite, Vercel · bubblechickenlab.com/towerzero

- Interactive 3D resume as a cyberpunk skyscraper — navigate floors for education, projects, skills, credentials, and contact (React Three Fiber, orthographic camera)
- Per-floor exhibits with holographic 3D markers, glass overlay cards, boot sequence animation, dark and light themes, i18n (English, Traditional Chinese, Japanese), SVG 2D fallback for reduced motion
- Deployed on Vercel; open source on GitHub (louislibuilds/tower-0); shareable interactive resume for recruiters

PROJECTS

KATA

2025

Sole Developer

React, TypeScript, Vite, Tailwind CSS, PDF Export, Supabase · [bubblechickenlab.com/kata](#)

- Guided resume builder with live A4 preview, four print-ready templates (Heritage, Clean, Sidebar, Classic), and PDF export with clickable links up to four pages
- Nine-step workflow with section reorder, per-entry visibility toggles, localStorage auto-save, and .kata.json draft import and export for per-job tailoring
- Integrated job application tracker (kanban pipeline); open source on GitHub (louislibuilds/kata); used daily for active job search

your-rock-is-coming

Feb 2026 – Feb 2026

Team Lead and Full-Stack Developer

React, TypeScript, Express, Leaflet, Open-Meteo, SQLite · [louislibuilds](#)

- Built at UniHack 2026 in 48 hours: Sydney tennis court discovery with surface, lighting, parking, and suburb filters plus weather-aware booking (7-day forecast, rain chance, dryness index)
- Shipped full-stack React, TypeScript, Express, SQLite and a frontend-only demo path; integrated Leaflet maps and Open-Meteo weather API
- Led cross-functional team under hard deadline; open source on GitHub (louislibuilds/your-rock-is-coming)

SUNishop - Cloud E-Commerce

2025 – 2025

Full-Stack Developer

React, Node.js, MongoDB, AWS, CI/CD, Vercel, Railway · [louislibuilds](#)

- UTS coursework (Cloud Computing and SaaS 100 HD, Infrastructure for Cloud Computing 95 HD): migrated legacy LAMP e-commerce to MERN stack with CI gates and automated server tests
- Deployed on AWS via UTS AWS Academy; re-hosted to Vercel (frontend), Railway (API), and MongoDB Atlas when credits expired so the storefront stayed live
- Open source on GitHub (louislibuilds/SUNi-Make-Your-Day-Shining); live storefront with React, Node and Express API, and MongoDB data layer

EXPERIENCE

Founder, Full-Stack Developer

Jun 2026 – Present

bubblechickenlab, Sydney, NSW

- Independent studio shipping production web apps on bubblechickenlab.com — portfolio (NAGI), resume and application workflow (KATA at /kata), and Tower Zero interactive 3D resume
- End-to-end ownership from schema to deploy: React and TypeScript UI, Supabase (Auth, Row Level Security, Postgres, Edge Functions, Resend email), Three.js and React Three Fiber, TipTap CMS, SEO prerender, Vercel CI/CD
- Designed shared auth, design system, and trilingual UI (English, Traditional Chinese, Simplified Chinese) across apps used daily in active job search

Kitchen Hand

May 2023 – Jan 2024

Tangalooma Island Resort, Brisbane, QLD

- Supported kitchen operations in a high-volume Queensland resort — prep, stocking, and back-of-house workflow
- Followed food safety and hygiene procedures; adapted quickly to new equipment and routines in an unfamiliar environment
- Reliable attendance and punctuality in a team-based hospitality setting — early Australian local work experience

CERTIFICATIONS

Dean's List · UTS Faculty of Engineering and IT

2026

TechFest AI Showcase Nominee · University of Technology Sydney

2026

Letter of Recognition - Service to UTS TSA · UTS Taiwan Student Association

2026
